Description

**BODYLIFT +
THE ACTIVE 3 - STEP PROGRAM AGAINST SKIN RELAXATION**

STEP 2: LIFTING AND FIRING

This soft cream guarantees deep **nourishment** to the skin, restoring tone and elasticity.

Thanks to the complex of nourishing and regenerating active ingredients, it **combats dryness and dehydration**, it leaves the skin softer, more **toned and firm**.

It acts effectively **against skin aging** and it is particularly suitable for the areas most at risk of sagging, such as arms, chest, abdomen and inner thighs.

It is enriched with shea butter, with its extreme **emollient and moisturizing power**, while hyaluronic acid and natural oils give **elasticity and smoothness** to the skin.

Its rich and soft texture is suitable for a prolonged massage.

Dermatologically Tested, Vegan OK, Nickel Tested.

Main Assets

SODIUM HYALURONA

Hyaluronic acid is responsible for maintaining the degree of hydration, turgidity, plasticity and viscosity of the skin thanks to its absorbent effect, which captures the water inside the epidermis. The result is an increase in skin elasticity and a decrease in wrinkles.

BETAINE

Has the ability to provide strong skin hydration.

SHEA BUTTER

Very valuable butter for its emollient, soothing, moisturizing and re-vitalizing properties. What makes it so suitable for the skin is its high content of fatty acids essential for hydration and elasticity of the skin. Naturally rich in vitamins A, E and F.

OLIVE-WHEAT-SOY UNSAPONIFIABLE

These components play an important role in maintaining an adequate level of epidermal hydration in order to protect the skin with a barrier effect.

BLACK CURRANT OIL

Blackcurrant oil is rich in anthocyanins and polyphenols, has antioxidant and moisturizing activity, prevents skin aging thanks to its astringent property due to the presence of tannins.

ALOE VERA ORGANIC JUICE

Has emollient and anti-aging properties.

POLYMNIA SONCHIFOLIA ROOT JUICE

Pure vegetable juice with prebiotic activity.

LACTOBACILLUS

Bacteria capable of stimulating the secretion of antimicrobial peptides, such as beta defensins. Probiotics are now recognized for their ability to stimulate these defensins, as a defense system mechanism of the skin itself.

ALPHA-GLUCAN OLIGOSACCHARIDE

They are polymers consisting of glucose residues characterized by pre-biotic activity.
