Description

MOISTURIZE

ANTIAGE

A latest generation formula that combines the effectiveness of **Hyaluronic Acid with Vegan Collagen** for a perfect anti aging effect.

**Fights** effectively and visibly **wrinkles, dehydration** and **loss of face and neck elasticity**.

Gives the face a fresh and youthful appearance, acting like a lifting effect without scalpel.

Formulated with **96% natural ingredients**.

It contains hyaluronic acid with 3 molecular weights which act in different skin levels.

Combined with collagen, it redensifies the skin and gives elasticity and firmness to every age skin.

Suitable for all skin types.

The cream is enriched with precious vegetable oils and extracts, such as sweet almond oil, jojoba oil and aloe gel.

This enhances the nourishing and anti-aging effect and gives a healthier and brighter skin appearance.

At the same time, its rich and soft texture instantly gives a deep sense of well-being.

**For mature skin:** Visible reduction of wrinkles. More elastic skin, face looking younger.

**For younger skin:** Maintains hydration, prevents wrinkles and signs of aging.

**WITHOUT SILICONES, PEG, EDTA, PARABENS, MINERAL OILS.**

**VEGAN OK, NICKEL TESTED, DERMATOLOGICALLY TESTED.**

**96% NATURAL INGREDIENTS**

## Main Assets

### HYALURONIC ACID (AT 3 DIFFERENT MOLECULAR WEIGHTS)

It has the ability to act differently on the epidermis:

Moisturize - Deep and long-lasting hydration.

Anti age - More elastic skin, greater tone, healthy appearance.

Wrinkle - Filler effect, lifting effect without scalpel, volumizing, plumping.

### MEDIUM-HIGH MOLECULAR WEIGHT HYALURONIC ACID (SODIUM HYALURONATE)

Obtained from natural biotechnological fermentation (Cosmos certified organic ingredient and also used in subcutaneous fillers), it is composed of macromolecules with extraordinary ability to capture and bind water in a physiological way. It remains in the most superficial part of the epidermis. Creating a film capable of retaining water, it gives immediate hydration to the skin. It also protects the skin, makes it smoother and more toned.

The hyaluronic acid used in this product has a high degree of purity, which makes it effective and safe.

### **MEDIUM-LOW MOLECULAR WEIGHT HYALURONIC ACID (SODIUM HYALURONATE)**

Medium-sized molecule has extraordinary ability to capture and bind water in a deep way. Makes the skin more toned, healthy and protected. At the same time it performs an effective anti-wrinkle and anti-aging action.

The acid purity makes it particularly effective and safe and permits the best penetrability over time.

### **VERY LOW MOLECULAR WEIGHT HYDROLIZED HYALURONIC ACID (HYDROLIZED HYALURONIC ACID)**

Due to its small size, it penetrates the skin, and hydrates deeply. It has an effective anti aging action and improves significantly skin elasticity. Provides lifting effect without a scalpel and restores firmness and volume to the skin.

### **VEGETABLE COLLAGEN (ACACIA SEYAL GUM EXTRACT)**

Vegan collagen comes from the Senegal acacia plant (acacia gum or gum arabic) and is composed of oligosaccharides and glycoproteins. Vegetable collagen is an optimal substitute for collagen, as it helps skin hydration. It makes the skin more elastic, toned and compact.

### **BIO ALOE JUICE (ALOE BARBADENSIS LEAF JUICE)**

It contains very useful active ingredients in cosmetics, which have protective and moisturizing actions. Used in combination with hyaluronic acid, it enhances its effectiveness. Its extraordinary properties derive from its ability to bind water molecules (both the external one and the natural moisture present in the skin) and to retain them inside the stratum corneum. The aloe gel is able to act on dehydrated skin areas, in critical areas such as burns, ulcers, eczema, etc. It is extremely effective in increasing the hydration and firmness of the skin, for a deep soothing action in case of redness and burns.

### **BIO JOJOBA OIL (SIMMONDSIA CHINENSIS SEED OIL)**

The composition of jojoba oil differs from other vegetable oils. It is a wax, but it looks like an oil. Therefore it has greater fluidity, stability and resistance to oxidation due to the presence of tocopherols. It has a non-greasy feel that makes it one of the most popular oils, used since ancient times for its healing action. Its protective, nourishing, emollient and softening properties are also known, thanks to the lipid constituents that allow rapid absorption on the one hand and a high film-forming activity on the other. It also has a protective action against UV rays, and an antibacterial activity.

### **BIO SWEET ALMOND OIL (PRUNUS AMYGDALUS DULCIS OIL)**

It is obtained by cold pressing sweet almonds. It is one of the oils that contain the highest percentage of unsaturated and polyunsaturated fatty acids, both with particular eudermic properties. Sweet almond oil has always been appreciated for its emollient, softening, nourishing and soothing properties and is tolerated even by the most sensitive skin, such as children's skin. It has a soothing and calming action on irritated, delicate and reddened skin. Easily absorbed, resistant to atmospheric agents, and rich in vitamins E, B, proteins, it favors its renewal.

### **DICAPRYLYL CARBONATE**

Vegetable oil with high penetration capacity. Allows a quick massage. It is non-greasy and it is a powerful moisturizer for the skin. It also protects irritated skin.

### **VEGETABLE GLYCERIN (GLYCERIN)**

Molecule obtained from vegetable oils that has a natural ability to retain water. It is used for its moisturizing properties. Keeps the skin healthy, protected, soft and super hydrated.

### **PROPANEDIOL**

Glycol of vegetable origin obtained from corn. It has a very high environmental and dermatological compatibility. Its main action is to moisturize, but it also acts as a "carrier" of the other active ingredients presenting in the cosmetic formulation and helping their absorption in the skin.

### **SODIUM PHYTATE (SODIUM PHYTATE)**

Found in almost all plants. Combined with calcium and magnesium salts. It is extracted from rice bran. A traditional Japanese medicine uses it as an antioxidant and immunostimulant, as long as in natural cosmetics it is used as a powerful chelator. On the skin it is related to an increase in hydration, elasticity, brightness and has a sebum regulating action.

### **TREHALOSE (TREHALOSE)**

It is a disaccharide present found in many plants and organisms and thanks to it they survive in difficult environmental conditions, since it creates a very thin film capable of preserving the molecules. It protects them from external agents and maintains all their functional characteristics unaltered.

On the skin it creates a film that acts as a protection against free radicals. At the skin level, trehalose envelops the water molecule, keeping hydration constant. At the same time it protects the skin from the most common pollutants and slows down the aging process. It is an excellent natural antioxidant, particularly suitable for mature skin that has lost its elasticity.

### **BETAINE (BETAINE)**

Molecule present in numerous plants. It is obtained from beets, on the skin it has extraordinary moisturizing properties comparable to glycerin. It increases the cell turnover of the stratum corneum, renews the skin and brings greater freshness to sensitive skin.

### **VITAMIN E (TOCOPHEROL)**

It is a natural antioxidant, preventing or slowing down aging. Particularly suitable for mature skin with loss of elasticity. It protects and restores the natural hydrolipidic film.

### **WIDE SPECTRUM PRESERVATIVE (BENZYL ALCOHOL, SALICYLIC ACID)**

Having natural origin, it acts against Gram + and Gram- bacteria, molds and yeasts.

**All The Ingredients**

AQUA (WATER), DICAPRYLYL CARBONATE, GLYCERIN, ALOE Barbadensis LEAF JUICE \*, COCOGLYCERIDES, BETAINE, propanediol, Prunus amygdalus dulcis (SWEET ALMOND) OIL \*, Hydroxyethyl ACRYLATE / SODIUM Acryloyldimethyl taurate COPOLYMER, Isohexadecane, TREHALOSE, Simmondsia Chinensis (Jojoba) SEED OIL \*, SODIUM HYALURONATE, BENZYL ALCOHOL, HYDROLYZED HYALURONIC ACID, ACACIA SEYAL GUM EXTRACT, PARFUM (FRAGRANCE), TOCOPHEROL, SALICYLIC ACID, SODIUM PHYTATE, LAURYL GLUCOSIDE, ACACIA SEYAL GUM EXTRACT.

**How to Use**

Apply two times per day a small amount of cream at face and neck and massage gently from the inside out.

50ml
